Engine Control Systems Website Adds New Publications Page

Newmarket, ON, [June 11, 2008] – Engine Control Systems (ECS) is pleased to announce a new page has been added to their website. The 'Publications' section of www.enginecontrolsystems.com consists of SAE papers relating to studies in emission reduction and retrofitting technologies. Presentations given by Engine Control Systems are also included for public access.

About Engine Control Systems

Engine Control Systems is a leading environmental **applications engineering** and manufacturer specializing in the design and manufacturing of a full range of verified exhaust treatment solutions. Globally, we offer a full range of products for OEM, Aftermarket and retrofit markets for the reduction of exhaust emissions of on-road, off-road and stationary diesel, gasoline and alternative fuel engines including propane and natural gas.
