Engine Control Systems Keeps on Shipping!

Thornhill, ON, January 12, 2010 – Engine Control Systems (ECS), a Catalytic Solutions, Inc. Company, is pleased to announce its continued successful fulfillment of product shipments. Recent key projects include:

- Over 300 Diesel Particulate Filters (DPF's) to the Bay Area Air Quality Management District (BAAQMD) Drayage Truck Retrofit Project; and
- Several hundred Diesel Oxidation Catalyst (DOC's) shipments under various United States Environmental Protection Agency (U.S. EPA) as well as Diesel Emissions Reduction Act (DERA) projects.

Engine Control Systems is committed to a cleaner environment and improving the quality of life for people on the job and around the world by designing and manufacturing exhaust treatment performance systems that significantly reduce harmful emissions.

“This is a reflection of our dedicated staff, strong distribution partners and unparalleled product offering. In a difficult economy, this is certainly welcome news not only for ECS but for all of our project partners and suppliers and the many areas in which we do business and is particularly rewarding since it will have such a hugely positive environmental impact”, commented Ian MacDonald, Vice President of Sales and Marketing at Engine Control Systems.

About Engine Control Systems:

ECS is a leading supplier of emissions control products to regulated and unregulated markets in North America, the European Union, and developing countries. Many of ECS' products are verified under various programs established by the United States EPA, California Air Resources Board, Sweden Environmental Zones, Swiss VERT, UK Energy Savings Trust and other governmental agencies around the world.

About Catalytic Solutions, Inc.:

Catalytic Solutions is a global manufacturer and distributor of emissions control systems and products, focused in the heavy-duty-diesel and light-duty-vehicle markets. The Company's emissions control systems and products are designed to deliver high value to customers while benefiting the global environment through air quality improvement, sustainability and energy efficiency.
